

# Luscious<sup>®</sup>

Tristaniopsis laurina 'DOW10' 

- Bigger leaves
- A native alternative to compact Magnolia trees
- Incredible looking bark

Beautiful cream stem emerges

Contrasting new growth

A vastly improved form of the *Tristaniopsis laurina*, features leaves almost double the size of the original with a lush, shiny appearance with coloured new growth. The bark has a striking port colour that peels back, revealing a cream stem. Luscious is highly suited for street planting, parks and ovals, home gardens or just as an elegant shade tree. Luscious thrives in a range of conditions. It will tolerate frosts and drought but will do best in a warm moist position. Luscious will grow to 7-12m tall and its flowers are yellow with a sweet perfume.
