

Sublime™

Acmena smithii 'DOW30' (D) PKR

- Vivid lime new growth
- Extremely psyllid resistant
- Great shape for a tree; yes, this is a tree Lilly Pilly, not a shrub

Contrasting new growth

Sublime is ideal for screening, hedges, topiary or garden features. The foliage is dense all the way to the ground level. Masses of white fluffy flowers appear in Summer that develop into a deep mauve berry, giving an excellent contrast against the foliage. These berries are also edible. Sublime is excellent for attracting birds to your garden. Sublime will tolerate a wide range of conditions from seaside gardens to cold climates with light frosts. Unlike most Acmena this is an advanced tree, not a shrub.

ADVANCED
TREE
RANGE

DESCRIPTION	Lush green new foliage
HEIGHT & WIDTH	5m x 2m-3m
POSITION	Full sun to part shade
CARE	Trim as required
